Follow the steps below to start your design search using this powerful AI generator.

Deep AI Dashboard

- Click the link below for Deep AI:
<https://deepai.org/machine-learning-model/text2img>

This is the Deep AI dashboard

See letter descriptions below

See Legend below:

A: This is known as the Prompt

Some best practices for writing effective AI image prompts include:

1. Use clear, descriptive language.
2. Be specific about details (subject, setting, lighting, colors, mood)
3. Experiment with prompt length to find what works best for each AI tool.
4. Use style modifiers and artistic references when appropriate.

Refer to this website for creating detailed Prompts:

<https://letsenhance.io/blog/article/ai-text-prompt-guide/>

B: **This will be the last thing you do to create your image.** B, will generate the design according to the selections/prompts you entered.

C: Indicates the Model. Select **HD** for all designs

D: Indicates your preference. Select **Quality**

E: Allows you to pick from over 100 styles:

Ex. (Cute Creature, Fantasy, 3D, etc.)

For best engraving results, look for designs/photos with a lot of contrast (Not too dark/light) and minimal background. See below examples of good contrast designs.

Reference: google stock photos

Find one you like, email it to us and we can determine if it will be good for engraving.
info@engrivablearts.com

Note: If you find a design/designs you like on this site, always save/download it.

If you click generate again with the same prompt, I have found that the system will generate another new image, but you can't click the back button and hope to find the previous image.

Save, Save, Save as you go.

File Format

We use the following formats for laser engraving:

SVG, DXF, JPG, PNG, BMP, and TIF

Where to find other laser engravable files

Once you find a design you like from the below links. Download/purchase the design in one of the file formats listed above. Then email the file to us: info@engrivablearts.com

Canva: <https://www.canva.com/>

Free SVG Designs: <https://freesvgdesigns.com/>

Lovesvg: <https://lovesvg.com/>

Color Me Crafty: <https://colormecrafty.net/>

Etsy: https://www.etsy.com/search?q=laser%20cut%20files&ref=auto-1&as_prefix=laser%20

Many other sites are offering free and purchased laser designs. You can do a Google search for the designs you are looking for.

Create your design

Here are some free and subscription-based programs you can use to create your designs.
